Respected sir/madam,

This is to certify that we were appointed as the Consulting Structural Engineers for the said project. This building is designed for G+2 floors as per IS-456 & IS-1893 and is structurally safe and sound for its intended use, to the best of my knowledge. The structural design work is carried out as per prescribed code requirements. The structure is designed as earthquake resistant structure. The quality of RCC work is prescribed per IS specifications in the structural drawings.

AVS consultants were responsible for safe transmittal of structural design through good for construction drawings. Client and Contractor's site engineers were responsible for site inspection, day to day monitoring and ensuring that the construction be carried out as per structural design and drawings.

All risks and liabilities related to material quality, procurement, workmanship, execution, formwork design, site construction labor safety, personnel safety, timeframe, are the sole responsibility of the contractor.
